

Bally®

Mortuary Systems

When customer focus is critical you need Bally backing you up.

Your company deserves the finest equipment to maintain the high quality standards so important to your reputation. Bally has built superior refrigeration systems for over 75 years and is the trusted source nationwide to meet the requirements of this and many demanding industries.

Our custom mortuary systems are engineered and manufactured to meet the specific needs of funeral directors, hospitals, EMS centers, and morgues.

Bally Mortuary Systems support good practice and profitability. The coolers provide increased operational flexibility which will decrease overall costs associated with this component of your organization.

All Bally equipment is constructed to help to reduce energy costs typically associated with refrigeration systems.

Our systems can be switched off like a conventional refrigerator when not in use, and cleaning is made simple. Bally's panel system makes enlarging or relocation possible.

We back up our Mortuary Coolers and Refrigeration Systems with a 10 year panel warranty and a network of trained service technicians to help you if any mechanical issue arises.

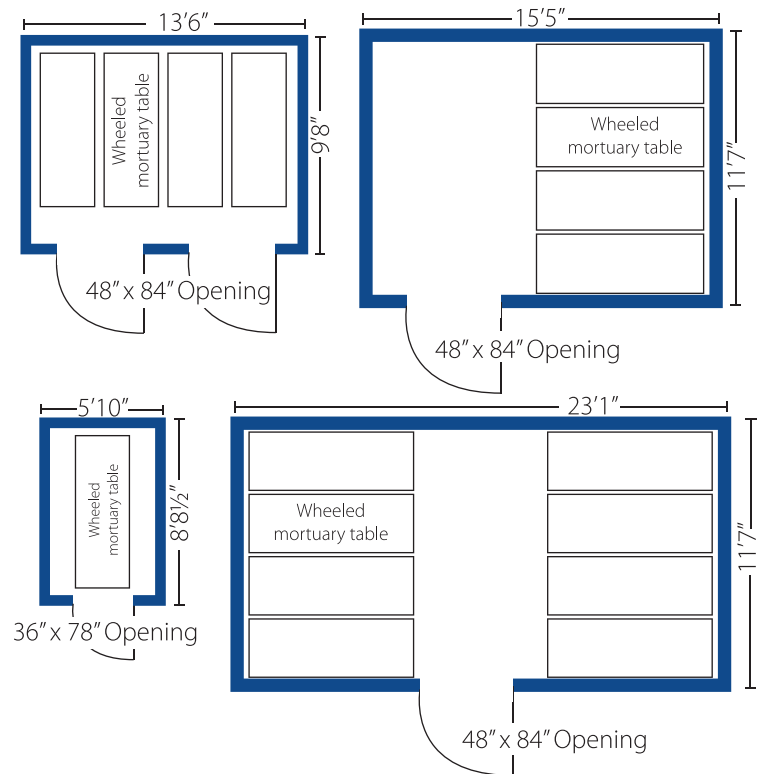

Installing a Bally Mortuary System will increase your efficiency and allow you to provide the highest level of dignified care and protection for your clients.

The only system built for you from the ground floor up.

Bally Mortuary Systems

- Systems are available in standard 1 to 9 body models, custom configurations are also available.
- Our standard heights range from 5'9" to 8'6" plus casters.
- Each layout contains enough space to easily maneuver wheeled tables.
- Systems come equipped with heavy duty aluminum or stainless steel slide out trays, which are easily removed to accommodate gurneys or caskets.

Construction:

- 4", 5" or 6", panels will not absorb moisture.
- Panels are manufactured with non ozone-depleting, poured-in-place urethane foam which meets or exceeds all industry standards for temperature control, sanitation, UL, and Federal Energy requirements.
- Panels are impervious to insect and rodent infestation.
- Bally's Speed-Lok joining system creates a snug, secure joint.
- Doors are constructed on U-channel structural steel frames and will not twist, rack or warp.

Refrigeration Systems:

- Bally manufactures a complete line of refrigeration systems.
- Systems are offered preassembled, remote, or self contained.
- The systems are engineered to require minimal installation, labor, and maintenance costs.
- Each system is balanced for top performance and low energy consumption.
- 115 or 220 Volt systems available.

Finishes:

- Stainless steel
- Stucco aluminum
- White polyester galvanized steel
- Embossed Galvalume steel

Options and Accessories:

- Steel locking casters
- Exterior ramp
- Temperature alarm system
- Locking bar for doors
- Telescopic tray system
- Cantilever shelf systems
- Variety of Florescent or LED lighting units
